CONTENTS.

PAPERS COMMUNICATED TO THE CHEMICAL SOCIETY.

PAGE

I.—The Chlorine Derivatives of Pyridine. Part IV. Constitution of the Tetrachloropyridines. By W. J. Sell, M.A., F.I.C., and F. W. Dootson, M.A. 1

II.—The Dissociation Constants of very Weak Acids. By James Walker and William Cormack 5

III.—The Preparation and Properties of Solid Ammonium Cyanate. By James Walker and John K. Wood . . 21

IV.—Etherification of Derivatives of β-Naphthol. By William A. Davis 33

V.—Contribution to our Knowledge of the Aconite Alkaloids. Part XV. On Japaconitine and the Alkaloids of Japanese Aconite. By Wyndham R. Dunstan, F.R.S., and Harold M. Read, Assistant Chemist in the Scientific Department of the Imperial Institute 45

VI.—A Method of Separation of the various Isomerides contained in ordinary commercial Xylidine. By W. R. Hodgkinson and Leonhard Limpach 65

VII.—The Oxidation of Organic Acids in Presence of Ferrous Iron. Part I. By Henry J. Horstman Fenton, M.A., F.R.S., and H. O. Jones, B.A., B.Sc. 69

VIII.—Oxalacetic Acid. By Henry J. Horstman Fenton, M.A., F.R.S., and H. O. Jones, B.A., B.Sc. 77

IX.—Determination of the Constitution of Fatty Acids. Part II. By Arthur William Crossley and Henry Rondel Le Sueur 83

X.—Preparation of Benzeneazo-*o*-nitrophenol. By J. T. Hewitt 99

XI.—Ethyl Dibromobutanetetracarboxylate and the Synthesis of Tetrahydrofurfuran-2 : 5-dicarboxylic Acid. By Bevan Lean, D.Sc., B.A. 103

XII.—The Atomic Weight of Nitrogen. By George Dean, B.A. 117

XIII.—Formation of α- and β-Acrose from Glycollic Aldehyde. By Henry Jackson, B.A., Fellow of Downing College, Cambridge 129

PAGE

XIV.—Substituted Nitrogen Chlorides and their Relation to the Substitution of Halogen in Anilides and Anilines. Part II. The Trichlorophenyl Acyl Nitrogen Chlorides. By F. D. Chattaway and K. J. P. Orton 134

XV.—The Decomposition of Chlorates, with Special Reference to the Evolution of Chlorine and Oxygen. Part I. By William H. Sodeau, B.Sc. 137

XVI.—The Interaction of Sulphuric Acid and Potassium Ferrocyanide. By Richard Haliburton Adie, M.A., B.Sc., and Kendall Colin Browning, B.A. 150

XVII.—Action of Alkyl Iodides on the Mercuric Iodide Sulphides of the Fatty Series. By Samuel Smiles, B.Sc. . 160

Victor Meyer Memorial Lecture. By T. E. Thorpe, Ph.D., D.Sc., LL.D., F.R.S., President of the Chemical Society . 169

XVIII.—Electrolytic Preparation of Induline Dyes. By Emerique Charles Szarvasy, Ph.D. 207

XIX.—Action of Chloroform and Potassium Hydroxide on *o*-Aminobenzoic Acid. By Walter J. Elliott, M.A. . 213

XX.—Anhydrous Sulphates of the Form $2M''SO_4,R'_2SO_4$; especially those of Isometric Crystallisation. By Frederic R. Mallet 216

XXI.—C-Derivatives of Hydroxytriazole. By George Young, Ph.D., and Ernest Witham, B.A., B.Sc. 224

XXII.—Note on Volhard's Method for the Assay of Silver Bullion. By Thomas Kirke Rose, D.Sc. 232

XXIII.—The Chlorine Derivatives of Pyridine. Part V. The Constitution of Citrazinic Acid. Formation of 2 : 6-Dichloropyridine and 2 : 6-Diiodoisonicotinic Acid. By W. J. Sell, M.A., F.I.C., and F. W. Dootson, M.A. 233

XXIV.—The Formation of Heterocyclic Compounds. By Siegfried Ruhemann and H. E. Stapleton, Scholar of St. John's College, Oxford 239

XXV.—Studies in the Camphane Series. Part I. Nitrocamphane. By Martin Onslow Forster 251

XXVI.—The Refractive and Magnetic Rotatory Powers of some Benzenoid Hydrocarbons. The Refractive Powers of Mixtures. An improved Spectrometer Scale Reader. By W. H. Perkin, LL.D., Ph.D., F.R.S. 267

XXVII.—The Condensation of Formaldehyde with Ethyl Malonate, and Synthesis of Pentamethylene-1 : 2 : 4-tricarboxylic Acid. By J. Frank Bottomley and W. H. Perkin, jun. 294

XXVIII.—Action of Fuming Nitric Acid on α-Dibromocamphor. By Arthur Lapworth and Edgar M. Chapman, Salter's Fellow in the Research Laboratory of the Pharmaceutical Society of Great Britain 309

PAGE

XXIX.—The Absorption Spectra of Ammonia, Methylamine, Hydroxylamine, Aldoxime, and Acetoxime. By Walter Noel Hartley, F.R.S., and James J. Dobbie, D.Sc., M.A. . 318

XXX.—Ammonium Amidosulphate. By Edward Divers and Masataka Ogawa 327

XXXI.—Products of Heating Ammonium Thiosulphate, Sulphites, and Trithionate. By Edward Divers and Masataka Ogawa 335

XXXII.—The Combination of Sulphur Dioxide and Oxygen. By Edward John Russell and Norman Smith . . . 340

XXXIII.—Notes on the Estimation of Gaseous Compounds of Sulphur. By Edward John Russell 352

XXXIV.—Influence of the Nascent State on the Combination of Dry Carbon Monoxide and Oxygen. By Edward John Russell 361

XXXV.—Note on the Refraction and Magnetic Rotation of Hexamethylene, Chlorohexamethylene, and Dichlorohexamethylene. By Sydney Young, D.Sc., F.R.S., and Emily C. Fortey, B.Sc. 372

XXXVI.—Campholytic and Isolauronolic Acids. By James Walker and William Cormack 374

XXXVII.—Configuration of the Camphoric Acids. By James Walker and John K. Wood 383

XXXVIII.—The Constitution of Camphoric Acid. By James Walker 390

XXXIX.—The Maximum Pressure of Naphthalene Vapour. By Richard William Allen, M.A., University College, Auckland, N.Z. 400

XL.—The Maximum Pressure of Camphor Vapour. By Richard William Allen, M.A., University College, Auckland, N.Z. 413

XLI.—Apiin and Apigenin. Part II. Note on Vitexin. By Arthur George Perkin, F.R.S.E. 416

XLII.—Yellow Colouring Principles contained in Various Tannin Matters. Part VII. *Arctostaphylos Uva ursi*, *Hæmatoxylon Campeachianum*, *Rhus Metopium*, *Myrica Gale*, *Coriaria myrtifolia*, and *Robinia pseudacacia*. By Arthur George Perkin, F.R.S.E. 423

XLIII.—Potassium Nitrito-hydroximidosulphates and the Non-existence of Dihydroxylamine Derivatives. By Edward Divers, M.D., D.Sc., F.R.S., Emeritus Professor of Chemistry, and Tamemasa Haga, D.Sc., Professor of Chemistry in the Tōkyō Imperial University, Japan 432

XLIV.—Identification and Constitution of Fremy's Sulphazotised Salts of Potassium. By Edward Divers and Tamemasa Haga 440

PAGE

XLV.—Camphonic, Homocamphoronic, and Camphononic Acids. By Arthur Lapworth and Edgar M. Chapman, Salter's Fellow in the Research Laboratory of the Pharmaceutical Society 446

XLVI.—New Syntheses of Indene. By F. Stanley Kipping, Ph.D., D.Sc., F.R.S., and Harold Hall, A.I.C. . . 467

XLVII.—Pilocarpine and the Alkaloids of Jaborandi Leaves. By Hooper Albert Dickinson Jowett, D.Sc. 473

XLVIII.—Spectrographic Studies in Tautomerism. The Absorption Curves of the Ethyl Esters of Dibenzoylsuccinic Acid. By Walter Noel Hartley, F.R.S., and James J. Dobbie, M.A., D.Sc. 498

XLIX.—The Curves of the Molecular Vibrations of Benz*anti*-aldoxime and Benz*syn*aldoxime. By Walter Noel Hartley, F.R.S., and James J. Dobbie, M.A., D.Sc. 509

Bunsen Memorial Lecture. By Sir Henry Roscoe, B.A., Ph.D., D.C.L., LL.D., D.Sc., F.R.S., Hon. M.D. (Heidelberg), Corresponding Member of the French Academy of Sciences, Emeritus Professor of Chemistry in Victoria University, Vice-Chancellor of the University of London . . . 513

Annual General Meeting 555

Obituary Notices 591

L.—Electrolysis of the Nitrogen Hydrides and of Hydroxylamine. By Emerique Charles Szarvasy, Ph.D. . . 603

LI.—Constitution of Amarine, of its supposed Dialkyl- and Diacyl-derivatives, and of Isamarine. By Francis R. Japp, F.R.S., and James Moir, M.A., B.Sc. 608

LII.—Vapour Density of Dried Mercurous Chloride. By H. Brereton Baker, M.A. 646

LIII.—Preparation of Pure Hydrobromic Acid. By Alexander Scott 648

LIV.—A New Sulphide of Arsenic. By Alexander Scott . 651

LV.—Researches on the Alkyl-substituted Succinic Acids. Part II. *s*-Dipropyl, *s*-Diisopropyl, and $\alpha\alpha_1$-Propylisopropylsuccinic Acids. By William A. Bone and Charles H. G. Sprankling 654

LVI.—The Interaction between Sulphites and Nitrites. By Edward Divers and Tamemasa Haga 673

LVII.—Presence of Invertase in some Plants of the *Gramineæ*. Part I. By James O'Sullivan 691

LVIII.—Mannogalactan and Lævulomannan. Two New Polysaccharides. By Julian Levett Baker and Thomas Henry Pope 696

LIX.—The Dissociation Constant of Azoimide (Hydrazoic Acid). By Charles Alfred West, Assoc.R.C.S. . . . 705

PAGE

LX.—New Glucoside from Willow Bark. By Hooper Albert Dickinson Jowett, D.Sc. 707

LXI.—Bromination of Benzeneazophenol. By J. T. Hewitt and W. G. Aston 712

LXII.—Decomposition of Chlorates. Part II. Lead Chlorate. By William H. Sodeau, B.Sc. 717

LXIII.—Action of Iodine on Alkalis. By Robert Llewellyn Taylor 725

LXIV.—Alkylation by means of Dry Silver Oxide and Alkyl Halides. By George Druce Lander, D.Sc. 729

LXV.—Hydrosulphides, Sulphides, and Polysulphides of Potassium and Sodium. By W. Popplewell Bloxam, B.Sc. . 753

LXVI.—Chlorine Derivatives of Pyridine. Part VI. Orientation of some Chloraminopyridines. By W. J. Sell, M.A., F.R.S., and F. W. Dootson, M.A. 771

LXVII.—Note on Partially Miscible Aqueous Inorganic Solutions. By G. S. Newth 775

LXVIII.—Racemic and Optically Active Forms of Amarine. By H. Lloyd Snape, D.Sc., Ph.D. 778

LXIX.—Substituted Nitrogen Chlorides and Bromides derived from *o*- and *p*-Acetotoluidide. By F. D. Chattaway and K. J. P. Orton 789

LXX.—Ortho-substituted Nitrogen Chlorides and Bromides and the Entrance of Halogen into the Ortho-position in the Transformation of Nitrogen Chlorides. By F. D. Chattaway and K. J. P. Orton 797

LXXI.—Nitrogen Chlorides derivable from *m*-Chloroacetanilide and their Transformation. By F. D. Chattaway, K. J. P. Orton, and W. H. Hurtley 800

LXXII.—Condensation of Ethyl Acetylenedicarboxylate with Bases and β-Ketonic Esters. By Siegfried Ruhemann and H. E. Stapleton, B.A., Scholar of St. John's College, Oxford 804

LXXIII.—Bromination of Benzeneazophenol. Part II. By John Theodore Hewitt and William George Aston . . 810

LXXIV.—Action of Formaldehyde on Amines of the Naphthalene Series. Part II. By Gilbert Thomas Morgan, D.Sc. 814

LXXV.—Estimation of Hypoiodites and Iodates and the Reaction of Iodine Monochloride with Alkalis. By K. J. P. Orton and W. L. Blackman 830

LXXVI.—Researches on Silicon Compounds. Part VI. On Silicodiphenyldiimide and Silicotriphenylguanidine. By J. Emerson Reynolds, D.Sc., M.D., F.R.S. 836

LXXVII.—A Study of the Absorption Spectra of *o*-Oxycarbanil and its Alkyl Derivatives in relation to Tautomerism. By Walter Noel Hartley, F.R.S., James J. Dobbie, D.Sc., M.A., and Photios G. Paliatseas 839

PAGE

LXXVIII.—Ultra-violet Absorption Spectra of Some Closed Chain Carbon Compounds. Part II. Dimethylpyrazine, Hexamethylene, and Tetrahydrobenzene. By WALTER NOEL HARTLEY, F.R.S., and JAMES J. DOBBIE, D.Sc., M.A. . . 846

LXXIX.—The Constitution of Pilocarpine. Part I. By HOOPER ALBERT DICKINSON JOWETT, D.Sc. 851

LXXX.—Isomeric Partially Racemic Salts containing Quinquevalent Nitrogen. Parts I—VI. Hydrindamine Bromocamphorsulphonates, Chlorocamphorsulphonates, and *cis*-π-Camphanates. By FREDERIC STANLEY KIPPING, Ph.D., D.Sc., F.R.S. 861

LXXXI.—Constitution of Ethyl Sodiocyanacetate and of Ethyl Sodiomethylcyanacetate. By JOCELYN FIELD THORPE . . 923

LXXXII.—*cis*- and *trans*-$aa_1\beta\beta$-Tetramethylglutaric Acids. By JOCELYN F. THORPE and WILLIAM J. YOUNG. 936

LXXXIII.—β-Isopropylglutaric Acid and *cis*- and *trans*-Methylisopropylglutaric Acids. By F. H. HOWLES, JOCELYN F. THORPE, WILLIAM UDALL, and, in part, H. A. NEALE . . 942

LXXXIV.—The Persulphuric Acids. By T. MARTIN LOWRY, D.Sc., and JOHN H. WEST 950

LXXXV.—Dimethyldiacetylacetone, Tetramethylpyrone, and Orcinol Derivatives from Diacetylacetone. By J. N. COLLIE, F.R.S., and B. D. STEELE, B.Sc. (Melbourne), 1851 Exhibition Scholar 961

LXXXVI.—Dehydracetic Acid. By J. N. COLLIE, F.R.S. . 971

LXXXVII.—Decomposition of Hydroxyamidosulphates by Copper Sulphate. By EDWARD DIVERS and TAMEMASA HAGA 978

LXXXVIII.—Condensation of Phenols with Esters of the Acetylene Series. Part I. Action of Phenols on Ethyl Phenylpropiolate. By SIEGFRIED RUHEMANN and FRED. BEDDOW, D.Sc., Ph.D. 984

LXXXIX.—Estimation of Furfuraldehyde. By WILLIAM CORMACK 990

Friedel Memorial Lecture. By J. M. CRAFTS, Professor . . 993

XC.—Diphenyl- and Dialphyl-ethylenediamines, and their Nitroderivatives, Nitrates, and Mercurichlorides. By WILLIAM SLOAN MILLS, B.A., Demonstrator of Chemistry in the Queen's College, Galway 1020

XCI.—Researches on Morphine. Part I. By S. B. SCHRYVER and FREDERIC H. LEES 1024

XCII.—The Oxime of Mesoxamide and some Allied Compounds. By MARTHA ANNIE WHITELEY, B.Sc. 1040

XCIII.—Phenylacetylchloramine and its Analogues. By HENRY E. ARMSTRONG 1047

XCIV.—Derivatives of Cyanocamphor and of Homocamphoric Acid. By ARTHUR LAPWORTH 1053

PAGE

XCV.—Asymmetric Optically Active Sulphur Compounds. *d*-Methylethylthetine Platinichloride. By WILLIAM JACKSON POPE and STANLEY JOHN PEACHEY 1072

XCVI.—A New Method of Estimating Potassium. By RICHARD HALIBURTON ADIE and THOMAS BARLOW WOOD 1076

XCVII.—Notes on the Chemistry of Chlorophyll. By LEON MARCHLEWSKI, Ph.D., and C. A. SCHUNCK 1080

XCVIII.—Sulvanite, a New Mineral. By G. A. GOYDER . . 1094

XCIX.—Acetyl and Phenacetyl Derivatives of Diethyl *d*-Tartrate. By JOHN MCCRAE and T. S. PATTERSON 1096

C.—Estimation of Atmospheric Carbon Dioxide. By JAMES WALKER 1110

CI.—Periodides of Substituted Oxonium Derivatives. By J. N. COLLIE, F.R.S., and B. D. STEELE, B.Sc. (Melbourne), 1851 Exhibition Scholar 1114

CII.—Condensation of Phenols with Esters of the Acetylene Series. Part II. Action of Phenols on Ethyl Phenylpropiolate and Ethyl Acetylenedicarboxylate. By SIEGFRIED RUHEMANN and FRED. BEDDOW, D.Sc., Ph.D. 1119

CIII.—Vapour Pressures, Specific Volumes, and Critical Constants of Di*iso*propyl and Di*iso*butyl. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. . . . 1126

CIV.—Vapour Pressures, Specific Volumes, and Critical Constants of Normal Octane. By SYDNEY YOUNG, D.Sc., F.R.S. 1145

CV.—Separation of Neobornylamine from Bornylamine. By MARTIN ONSLOW FORSTER and JAMES HART-SMITH, A.R.C.S. 1152

CVI.—Aminoamidines of the Naphthalene Series. (Third Communication on Anhydro-bases.) By RAPHAEL MELDOLA, F.R.S., and LEWIS EYNON, A.I.C. 1159

CVII.—Note on the Elimination of a Nitro-group during Diazotisation. By RAPHAEL MELDOLA and ELKAN WECHSLER 1172

CVIII.—A Contribution to the Stereochemistry of Sulphur: an Optically Active Sulphine Base. By SAMUEL SMILES, B.Sc. 1174

CIX.—Condensation of Phenols with Esters of the Acetylene Series. Part III. Synthesis of Benzo-γ-pyrone. By SIEGFRIED RUHEMANN and H. E. STAPLETON, Scholar of St. John's College, Oxford 1179

CX.—Contributions to the Chemistry of Hydrotetrazines and Triazoles. By OSWALD SILBERRAD, Ph.D. 1185

CXI.—Isomeric Dibenzyl Ketone Benzalanilines and Deoxybenzoin Benzalanilines. Part II. By FRANCIS E. FRANCIS, Ph.D., B.Sc., Lecturer in Chemistry, University College, Bristol 1192

PAGE

CXII.—Condensation of Methyl Acetonedicarboxylate. Constitution of Orcinoltricarboxylic Esters. By F. W. Dootson, M.A. 1196

CXIII.—Contribution to the Chemistry of the Aromatic Metadiamines. By Gilbert Thomas Morgan, D.Sc. . . . 1202

CXIV.—Action of Aromatic Aldehydes on Derivatives of β-Naphthylamine. By Gilbert Thomas Morgan, D.Sc. . 1210

CXV.—Action of Hydrogen Peroxide on Carbohydrates in the Presence of Ferrous Salts. II. By Robert Selby Morrell, M.A., Ph.D., and James Murray Crofts, M.A., B.Sc. 1219

CXVI.—The Hydroxyphenoxy- and Phenylenedioxy-acetic Acids. By W. Carter and W. Trevor Lawrence, B.A., Ph.D. 1222

CXVII.—Specific Gravities of the Halogens at their Boiling Points, and of Oxygen and Nitrogen. By Julien Drugman, Ph.D., and William Ramsay, F.R.S. 1228

CXVIII.—Hydroferrocyanic Acid. By Kendall Colin Browning, B.A. 1233

CXIX.—The Nature of Metal-ammonia Compounds in Aqueous Solution. Part I. By H. M. Dawson and J. McCrae . 1239

CXX.—Action of Alkalis on the Nitro-compounds of the Paraffin Series. Part II. Reactions and Constitution of Methazonic Acid and the Mode of Formation of Isoxazoles. By Wyndham R. Dunstan, F.R.S., and Ernest Goulding, B.Sc. 1262

CXXI.—Amount of Chlorine in Rain Water collected at Cirencester. By Edward Kinch, Royal Agricultural College, Cirencester 1271

CXXII.—Hexachlorides of Benzonitrile, Benzamide, and Benzoic Acid. By Francis Edward Matthews 1273

Nilson Memorial Lecture. By Otto Pettersson, Professor of Chemistry in the University of Stockholm 1277

CXXIII.—Degradation of Glycollic Aldehyde. By Henry J. Horstman Fenton, M.A., F.R.S. 1294

CXXIV.—Researches on the Alkyl-substituted Succinic Acids. Part III. Dissociation Constants. By William A. Bone and Charles H. G. Sprankling 1298

CXXV.—Genistein. Part II. By Arthur George Perkin, F.R.S.E., and Louis Hubert Horsfall 1310

CXXVI.—Luteolin. Part III. By Arthur George Perkin, F.R.S.E., and Louis Hubert Horsfall 1314

CXXVII.—Contributions to the Knowledge of Fluorescent Compounds. Part I. The Nitro-derivatives of Fluorescein. By John Theodore Hewitt and Bryan W. Perkins . . 1324
